

SERVICING YOUR GAS APPLIANCE NOT ONLY SAVES YOU MONEY...

IT COULD SAVE YOUR LIFE!

Half of Australian households are at risk from the effects of Carbon Monoxide
- A highly poisonous gas which has no colour, taste or smell

To ensure you're safe:

- Have your gas and fuel-burning appliance serviced a minimum of every two years by a licensed gasfitter. Make sure the gasfitter you choose uses a carbon monoxide analyser.
- Have a gasfitter install an audible Carbon Monoxide Alarm.
- Unblock all flues, vents and chimneys.
- Don't bring outdoor fuel-burning appliances indoors.
